4. Customers with characteristics of vulnerability

We have considered the needs, characteristics and objectives of customers with vulnerabilities at all stages of the design process, including in our identification of the target market. The Product is designed for standard Residential homeowners, which is likely to include some customers with characteristics of vulnerability or who will experience vulnerability over time.

Credit Repair customers are less likely to have a comprehensive understanding of mortgages or the mortgage market, particularly with regards to understanding the current market landscape and the impact future rate movements could have on their repayments. These customers are also more likely to be financially vulnerable, which may be linked to their impaired credit history. Therefore, these customers may look for advice and support to ensure they understand the information being presented to them and the implications of the arrangement they are entering into to reduce the risk of harm occurring. For this reason, these products are available through intermediary advice only and therefore not available on a direct or execution only basis.

Intermediaries should continue to comply with your obligations to ensure that you treat customers in vulnerable circumstances fairly.

Please contact us if you need any further information about how we support the needs of all our customers in relation to the Product.

5. Our assessment of value

We have developed a comprehensive and robust assessment process which evaluates several aspects of our business to determine the value of our mortgage product. This analysis is used to ascertain whether the Product delivers fair value for customers.

The outcomes of the assessment process are presented to the Performance & Product Governance Committee, allowing for challenge and further investigation before we sign-off the outcomes and share the summary of our assessment with you.

Our fair value assessment has considered the following:

Benefits	Price	Costs	Limitations
The range of features that the product provides, the quality of the product, the level of customer service that is provided and any other features that the product may offer	The interest rates, fees and charges customers pay for the product, comparable market rates, advice fees paid to intermediaries and non-financial costs associated with operating the product	The cost of funding the product and any other reductions in cost to the customer made possible by economies of scale	Any limitations on the scope and service we provide or the features of the product.

It should be noted that our fair value assessment has been completed under the assumption that as distributors of these products, a fair and justified fee has been charged for providing an advised service to the customer.

Results of our assessment

Our assessment concluded that the Product continues to deliver fair value for customers in the target market for the Product.
